| 1 | ABSTRACT |
|----|--|
| 2 | |
| 3 | This invention relates to the diagnosis and treatment of cancerous diseases, |
| 4 | particularly to the mediation of cytotoxicity of tumor cells; and most particularly to the |
| 5 | use of cancerous disease modifying antibodies (CDMAB), optionally in combination |
| 6 | with one or more chemotherapeutic agents, as a means for initiating the cytotoxic |
| 7 | response. The invention further relates to binding assays which utilize the CDMABs |
| 8 | of the instant invention. |
